

We knew there had to be a simpler ticketing solution.
So we created it.

THE SOLUTION

With no per ticket costs and low monthly fees, the ToCite software solution combined with custom selected hardware creates an efficient, time and money saving partner that streamlines parking enforcement while integrating seamlessly into your existing systems and databases. ToCite offers campuses, municipalities, hospitals and private properties an easy and effective parking solution no matter the size or budget.

Introducing ToCite® Mobile:

An efficient parking enforcement solution designed to facilitate ticket writing and the issuance of permits by using innovative features such as iChalk, iPermit, iMeter, and a new approach to Cloud-based citation management.

SOFTWARE

ToCite includes innovative, useful features not available elsewhere such as GPS and time/date annotation on images, images printed on citations, easy-to-use intuitive auto-fill fields, iChalk, iPermit and iMeter.

iChalk Electronic Tire Chalking aids officers in timing vehicle stays without notepads, bending, or physically contacting the vehicle or sidewalk by recording all vehicle movements on one of UPSafety's handheld computers. Officers work more efficiently and data is more accurate. iChalk makes parking enforcement simple and chalk free!

UPSafety's integrated permit management software, **iPermit**, is designed to sell, manage, and enforce permits from a single solution. iPermit increases revenue, decreases costs, and improves overall customer satisfaction.

iMeter allows for parking enforcement within locations that are controlled via Pay to Park either by Phone or by a Parking Kiosk. iMeter provides an overview of all spaces or vehicles that have paid for parking, are soon to be expired, or have recently expired thus allowing officers to target those areas for enforcement.

HARDWARE

ToCite is available on a variety ultra-rugged, all-in-one mobile computers with integrated printer and camera as well as on a wide range of Android™ platforms with remote printers. We also offer unique carrying accessories like breakaway neck straps and hip pouches. We spend time with our clients determining the best solution to facilitate the user and the environment.

FEATURES	BENEFITS
Photos printed on citation	Accurate Proof of Violation for every citation. Fewer disputes.
Electronic Signature Capture	Improved Violation Enforcement
iChalk Electronic Tire Chalking	Lower Court Costs/Time
Location Based (GPS) Technology with Locations/Time	Faster Citation Issuing from start to finish
Easy-to-read weatherproof / Archival Printed Citations	Simplifies the Overall Ticketing/Citation Process
Subscription/Lease versus Outright Purchase	Efficient and Effective Solutions for a Department of One (or One Hundred!)
	Cost effective: Monthly lease, no per ticket cost
iPermit Integration	Alerts Officers of permit validity and displays driver phone # and vehicle info. such as registration, make, model, color, etc.
	Validate permits instantly by scanning a permit barcode
iMeter	Real time integration with your kiosk or pay-to-park solution to identify paid spaces or vehicles as well as those recently expired
Voice Input	Issue a ticket completely by voice
Scofflaw Alerts	Identifies repeat offenders based on your chosen parameters

NO PER TICKET COSTS AND LOW MONTHLY FEES

ABOUT US

At UPSafety, we get it; the need to complete a task or series of tasks in an efficient and cost effective manner. We are on a mission to modernize traditional parking enforcement, citation writing, permit issuance and management. We incorporate the latest technology to simplify the ticketing process and back office.

SUPPORT

We strive to get our clients up and running in hours, not days. With our 24/7 support lines, no question or issue will go unanswered. From the street to the back office we understand the issues and are ready to help.

UPSafety CLOUD

All of our solutions are based entirely upon our "cloud" with mobile devices that are interfaced through the internet. Solutions do not require on-site servers, backup systems, updates, or any other typical IT support. The only requirements are an internet connection and a computer running a browser. We and all of our partners utilize state of the art security. Our Cloud has obtained the ISO/IEC 27001:2005 certification for Information Security Management, so you can be sure your data is safe and secure 24 hours a day. For more on our security measures visit our website.

UPSafety Cloud

STEP-BY-STEP

From start to finish, easy-to-read screens guide the user through the ticket and tire chalking steps whereby eliminating errors and shortening the citation/ticketing process.
