FOR IMMEDIATE RELEASE

United Public Safety Announces the First PA 3 Inch Traffic Citation Issued on the Innovative N5SCAN Mobile Computer

FORT WASHINGTON, PA (SEPTEMBER 28, 2017) – United Public Safety is pleased to announce the release of their PA 3 inch traffic citation software issued on the innovative N5SCAN.

According to company President Joan Young, “We have several PD’s that are currently using our 4 inch e-citation format in vehicle that will now use the N5Scan mobile computer to issue 3 inch citations from motorcycles, bikes and on foot. We knew there had to be a better way to issue a citation than printing and handing three full sheets of paper to a citizen; so we built it, with our most robust user interface and feature set to date”.

The sleek, lightweight N5SCAN mobile computer features a built in printer and high performance scanner as well as a 13MP color camera. It is also ultra-rugged and IP-65 rated for all weather conditions. This device, paired with United Public Safety’s ForCite mobile software allows for the issuance of a PA 3 inch traffic citations on the spot, with a first click to issuance time of less than one minute.

Features Include:

- A direct connection to the AOPC/JNET for instant electronic filing
- Ability to capture photo evidence and attach it to the citation
- A build in laser scanner, so officers can spend their time keeping the peace, not entering data
- Rip proof, waterproof ticket printing paper at a cost of less than 13¢ per ticket
- Immediately get alerted of repeat offenders during issuance
