

New York Law Enforcement Professionals wanted a simpler parking enforcement solution.

So we created it.

Introducing the ToCite® Empire Edition

UPSafety's ToCite Empire Edition is an efficient mobile parking solution designed specifically for New York clients. Built with direct input from New York law enforcement professionals, this Edition features fast, positive scans of windshield-mounted registration certificates.

SOFTWARE

ToCite Empire includes innovative, useful features not available elsewhere such as GPS and time/date annotation on images, images printed on citations, intuitive auto fill fields, positive scan and capture of New York State registration certificates, **iChalk**, **iPermit** and **iMeter**.

Obtain vehicle ownership data and place scoff detainers on New York registrations by direct export to the NY State Department of Motor Vehicles Parking Regulation Electronic Enforcement & Disposition System (PREED).

With **iChalk** Electronic Tire Chalking, officers can time vehicle stays without notepads, bending, or contacting the vehicle, capture vehicle's GPS location, and obtain photographic evidence utilizing UPSafety's rugged N5Scan. Officers work more efficiently and data is more accurate. **iChalk** makes parking enforcement simple and chalk free!

UPSafety's integrated permit management software, **iPermit**, is designed to sell, manage, and enforce permits from a single solution. Scanning a NY State window-mounted registration certificate with the N5 automatically displays all the vehicle's permit information. **iPermit** increases revenue, decreases costs, and improves overall customer satisfaction.

Features

- ★ Fast, positive, bar code scanning with Honeywell N6603 Series Adaptors 6.0 technology.
- ★ Direct export to New York Department of Motor Vehicles PREED System

Benefits

- ★ Auto-fill New York State registration certificate information or parking permit data with the push of a button.
- ★ Obtain ownership information for vehicles with unpaid parking tickets, and place registration holds on vehicles meeting Scofflaw criteria.

iMeter allows for parking enforcement in locations controlled via Pay to Park by phone or Parking Kiosk. It provides an overview of all spaces/vehicles that have paid for parking, soon to be expired, or recently expired, thus allowing officers to target those areas for enforcement.

HARDWARE

ToCite Empire features the Android-based N5Scan. When NY Law Enforcement professionals told us they needed the ability to obtain fast, positive scans of windshield mounted registration certificates, we listened, and added the powerful HoneywellN6603 scanner to our already exceptionally capable N5 class of handheld devices. The rugged N5Scan, with its integrated thermal printer and 13-megapixel camera, is simply the finest handheld ticketing device on the market today!

ToCite® Empire Edition

ABOUT UNITED PUBLIC SAFETY

At UPSafety, we get it; the need to complete a task or series of tasks in an efficient and cost-effective manner. We are on a mission to modernize traditional parking enforcement, citation writing, permit issuance and management. We incorporate the latest technology to simplify the ticketing process and back office.

SUPPORT

We strive to get our clients up and running in hours, not days. With our **24/7** support lines, no question or issue will go unanswered. From the street to the back office we understand the issues and are ready to help.

THE UPSAFETY CLOUD

All of our solutions are based entirely upon our "Cloud" with mobile devices that are interfaced through the internet. Solutions do not require on-site servers, back up systems, updates or any other typical IT support. The only requirements are an internet connection and a computer running a browser. We and all of our partners utilize state-of-the-art security. Our Cloud has obtained the ISO/IEC 27001:2005 certification for information Security Management, so you can be sure your data is safe and secure 24 hours a day. For more about our security measures visit our website at upsafety.net.

Step-by-Step

From start to finish, easy-to-read screens guide the user through the ticket and tire chalking steps, eliminating errors and shortening the citation/ticketing process.
